The preventive call concerns all customers whose magazine was made before 2019. These magazines do not have marked the date of production (X / XX - month / year) under the bottom cover (see attachment). Magazines made after 2019 will not be replaced.

The main reason for exchange is the possibility of dangerous cracking of the magazine pressure part. It could be caused by degradation of mechanical attributes of material, which was used before 2019. This problem can not be expected during the designing and production. Manufacturer also prohibits the usage of magazines made before 2019 for preventive reasons.

The exchange of magazines will be done after submission of invoice / bill / warranty list. We will also put a note about exchange in these documents.
